THE FUTURE OF ABILENE REGIONAL AIRPORT

Built in 1968, the Abilene Regional Airport terminal has undergone several upgrades over the years. The proposed terminal expansion and improvements project will address **capacity challenges, reduce congestion, and replace outdated systems.**

IMPROVEMENTS

EXPANDED BOARDING AREA

From 60 to **approximately 200 passenger seating capacity**, a semi-enclosed balcony with views of the airfield, new restrooms, assisted restroom, nursing mother's space, and enhanced vending.

INCREASED OPERATIONAL CAPACITY & IMPROVED AMENITIES

The terminal's capacity will be expanded to accommodate more passengers, ensuring **smoother flow through the security checkpoint and boarding areas.** The upper-level drive will be removed, and airline and rental car counters will be relocated to a larger first-floor lobby, reducing congestion and enhancing overall efficiency. **New energy efficient windows, new restrooms, more seating, expanded waiting areas, enhanced vending, and additional spaces for events and relaxation, including a balcony and outdoor areas.**

MODERNIZED MECHANICAL SYSTEMS

The **Security Access Control System** will be updated, a new **fire suppression system** will be added, **HVAC systems** will be replaced for improved energy efficiency, existing escalators and elevators will be replaced with **new elevators** to enhance accessibility, the **baggage claim system** will be replaced, and a **new generator** will be added, all contributing to the terminal's modernization and improved efficiency.

FUNDING

The terminal expansion would be funded by a combination of **federal grants up to \$50 million** and **\$20 million in local funding** by the City.

A special bond election will take place on **Saturday, May 3, 2025**, to approve \$20 million in local funding for the terminal expansion. If passed, this \$20 million investment would increase the annual tax bill of a property by approximately **\$13.43** (\$1.12 per month) for every \$100,000 of assessed value.
